

VATA 7 - WIRELESS Rx - 'PAIRING' INSTRUCTIONS

(FRONT VIEW)

(BACK VIEW)

1. Plug the fully charged VATA7 (3.7v) rechargeable battery into the RED Rx connector.
2. Press AND HOLD the Rx 'synch' button on the back of the Rx casing.
3. While still continuing to hold the synch button pressed in, turn the motorcycle's ignition switch to the 'ON' position.
4. While still continuing to hold the synch button pressed in, the lights on the the VATA7 gear (with the Rx attached to) will raise to full bright and then dim.
5. When the lights on the VATA7 gear reach the dim level, release the synch button.
6. The lights should begin FLASHING from full bright to dim level continuously.
7. Turn the motorcycle's ignition switch to the 'OFF' position and back to the 'ON' position.
8. Try the brake pedal and turn signals to be sure that the lights on the VATA7 gear are now paired with the motorcycle.
9. If not working try again. See our instruction veideo on our website and email us if you have any questions.
10. One can pair any VATA7 products to ANY motorcycle with our VATA7 Tx installed.
11. For GROUP riding, the entire group of motorcyclists can pair to just one (typically the leader's) motorcycle.

Be sure to test all equipment to be sure all lights work properly, before operating motorcycle.
